MAGSAYSAY SOLAR BATTERY CHARGING STATION

The Magsaysay Solar Battery Charging Station was established in 2003 under the management of Baranga Magsaysay – Renewable Energy Community Development Association (BaMag-RECDA).

The electricity from solar power produced has made comfort to the residents of Magsaysay, children can study at night with a steady light. Because the association had maintained an excellent policies and management.

After 4 years of operation
the project encounters no problem with regards to operation and management.
Officers and members of the organization are

still intact taking

part of their responsibilities.

The
association has repurchased and replaced damaged batteries of the members,
aside from Barangay Magsaysay, other neighboring sitios has also availed
services of the battery charging station which is an additional income of the
association. Also, the management has initialized an idea to lend their members
an initial capital in their corn farms as realization of their corn production
initiatives . Of course, the said loan scheme is bonded with the associations
rules and policies.

The good management practices has been the basis
of success of their association.
